EXPERIENCE

Software Engineer - InverseIQ (Jan 2026 - Present) Remote

- Architected and developed the core multi-tenant backend for the Inverse SC Core Platform using Python and Django, ensuring 100 data isolation through PostgreSQL schemas.
- Built key functional modules including dynamic table management, tenant onboarding, and real-time analytics dashboards, improving platform scalability and data reporting..
- Engineered a high-performance data orchestration layer automating PostgreSQL schema migrations based on metadata driven schema definitions.

Frontend Developer Intern - Dezainahub (Nov 2025 - Dec 2025) Remote

- Developed responsive UI components using React.js and Tailwind CSS to enhance user experience across devices.
- Integrated REST APIs and implemented basic performance optimizations like lazy loading for faster page rendering.

Full Stack Developer Intern - Genesis Web Solutions (May 2025 - Oct 2025) Delhi, India

- Developed delivered frontend for 4 projects from scratch with React.js and TailwindCSS ensuring high quality.
- Boosted page load efficiency by applying lazy loading and other performance optimization techniques.
- Improved development efficiency by 40 percent utilizing component libraries like ShadCN and Material UI.

PROJECTS & OPEN SOURCE

Open Source Contributions

- Contributed to [PR Link](#) setting up multi-step account creation flow by creating placeholder pages (Details, Terms, Charges, Preview) integrated with a Seed Card Stepper for seamless navigation and consistent UI layout.
- Developed a Seed Card [PR Link](#) Stepper with inline form validation for a multi-step Recurring Deposit Account flow, ensuring stepwise data persistence, dynamic progress tracking, and error handling per design specs.

SyncMeet – A serverless P2P video collaboration tool [Project Link](#)

Tech stack – React JS, TypeScript, WebRTC, Trystero (P2P Signaling), Vite, TailwindCSS

- Built a serverless 1:1 video collaboration platform using WebRTC and BitTorrent-based signaling, enabling fully client-side communication with secure, zero-latency P2P connections.
- Developed real-time collaboration tools including an interactive whiteboard, shared notes editor, and integrated rich chat to support productive remote sessions.

TECHNICAL SKILLS

Languages	C/C++, Python, JavaScript, TypeScript, SQL
Frontend	HTML, CSS, Tailwind CSS, React.js, Next.js Shadcn
Backend	ExpressJS, NodeJS, BunJS, Firebase, REST APIs
Tools	Git, GitHub, VS Code, Docker, Postman
App development	React native, Kotlin, Jetpack Compose, Koin, Retrofit, Ktor
Cloud/Databases	MySQL, MongoDB, DBMS, SQLite, Supabase

EDUCATION

Bachelor in Computer Applications, Indira Gandhi National Open University

2025
